MSN AGRO SEEDS PRIVATE LIMITED

PRODUCT CATALOGUE

We are most privileged to introduce ourselves as one of the leading company in research, production and marketing of vegetable seeds in india. MSN Agro Seeds is now a proud owner of huge portfolio of superior open pollinated research varieties & hybrid varieties in all major high value vegetables crops like cabbage, cauliflower, eggplant, radish, tomato, carrot, okra, cucurbits, hot pepper, etc. in India and has growing exports in overseas markets.

A strong thread of quality that runs through the very fabric of MSN Agro is its strong, adequate and efficient team the companies single most prominent asset. We reach farmers through its strong sales network of dealers and distributors. The product development team acts in close co-ordination with R&D and marketing and conducts trials, extensively in the farmer's fields before releasing to the market. The research and development team has successfully used both conventional and modern breeding tools to develop new hybrids and varieties to augment the increasing demands for better crops. This is achieved through high quality infrastructure such as extensive multi location breeding farms, poly green houses for micro environment and laboratory facilities etc. MSN Agro Seeds has research centers in all the important agro climatic zones of the country to make possible exhaustive testing of its hybrids and varieties before release. The company has excellent processing facilities and follows efficient seed production techniques considering seed quality and purity.

MSN Agro place the highest emphasis on quality products and maintain our standards of excellence.

F₁- RED KING

Plant type	Vigorous & erect plant with broad leaves
Maturity	70 days
Root colour	Dark red roots, free from white rings
Root shape	Round shape with 200 g weight
Resistance	Intermediate resistance to fungal diseases

MASTER (Imp.)

Plant type	Vigorous growing
Maturity	80 days
Root colour	Dark red
Root shape	Smooth top shaped with 180 g weight

SHAGUN (FRENCH BEAN)

Plant type	Bushy, dark green plant
Beans Length	18-20 cm
Fruit colour	Green Pods
Maturity	50-55 days
Remarks	Prolific bearing, high yield

KK-45 (COW PEA)

Plant type	Bushy, dark green plant
Beans Length	18-20 cm
Fruit colour	Green Pods
Maturity	50-55 days
Remarks	Prolific bearing, high yield

GOPI (COW PEA)

Plant type	Bushy, dark green, erect plant
Beans Length	24-28 cm
Fruit colour	Glossy Green Pods
Maturity	50-55 days
Remarks	Prolific bearing, high yield

KOHINOOR-55 (COWPEA)

Plant Type	Bushy, dark green plant
Beans length	30-32 cm
Colour	Attractive green
Maturity	60-65 days
Remarks	Tolerant Golden Mosaic Virus

GOMTI (COWPEA)

Plant type	Vigours Bushy Plant
Beans length	25-30 cm
Colour	Light Green
Maturity	55-60 days
Remarks	High Yield Potential

KARTIK (COWPEA)

Plant type	Semi Determinate
Beans Length	35-40 cm
Fruit colour	Light Green Shiny Pods
Maturity	50-55 days
Remarks	2-3 Pods/ Cluster

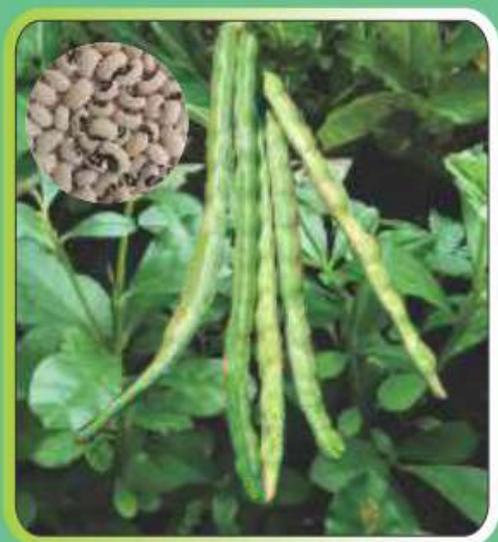

KIRAN (YARD LONG BEAN)

Plant type	Semi Determinate
Beans Length	50-60 cm
Fruit colour	Light Green
Maturity	55-60 Days
Remarks	Need To Support

CHAYA (YARD LONG BEAN)

Plant type	Semi Determinate Plant Habit
Beans Length	60-65 cm
Fruit colour	Dark Green
Maturity	55-60 days
Remarks	Need To Support

BLACK EYE (COW PEA)

Plant type	Vertical Determinate Erect Plant
Beans Length	12-15 cm
Fruit colour	Glossy Green
Maturity	60-65 days
Remarks	Tolerant To Virus

DESI (CLUSTER BEAN)

Plant type	Erect, tall
Beans length	8-10 cm
Colour	Medium green
Maturity	45 days
Remarks	Continuous bearing from bottom

SHREE-44 (CLUSTER BEAN)

Plant type	Medium tall, erect plant
Beans length	12-14 cm
Colour	Medium green
Maturity	50-55 days
Remarks	Short inter nodes

KRISHNA (CLUSTER BEAN)

Plant type	Erect, Tall
Beans Length	10-12 cm
Fruit colour	Glossy Green
Maturity	42 days
Remarks	Bearing from the bottom

F1- SUCHI-7

- Plant type Tall vigorous plant with short internodes
- First picking 40-42 days
- Fruit colour Glossy dark green
- Fruit size Medium long 10-12 cm in length
- Resistance Intermediate resistance to YVMV
- Remarks Good keeping quality

F1- SUCHI-8

- Plant type Tall vigorous plant with short internodes
- First picking 40-45 days
- Fruit colour Attractive glossy green
- Fruit size Medium long 13-14 cm in length
- Resistance Intermediate resistance to YVMV
- Remarks Good keeping quality

F1- KRANTI

- Plant type Tall vigorous plant with short internodes
- First picking 40-42 days
- Fruit colour Glossy dark green, thin fruits
- Fruit size Medium long 14-16 cm in length
- Resistance Intermediate high tolerance to YVMV
- Remarks Good keeping quality

F₁- SUNDRAM-9

Plant type	Tall vigorous plant with green leaves
First picking	40-42 days
Fruit colour	Glossy dark green with five ribs
Fruit size	14-16 cm in length
Resistance	Intermediate high tolerance to YVMV
Remarks	Good keeping quality & suitable for long distance transportation

F₁-MAHIMA

Plant type	Tall vigorous plant with short internodes
First picking	42-45 days
Fruit colour	Dark Green, Attractive Fruits
Fruit size	Medium long 8-10 cm in length
Resistance	Intermediate resistance to YVMV
Remarks	Best For Transportation/good Keeping Quality

HI-TECH

Plant type	Tall vigorous plant with short internodes
First picking	45-48 days
Fruit colour	Glossy Green
Fruit size	Medium long 10-12 cm in length
Resistance	Intermediate resistance to YVMV
Remarks	Best for transportation

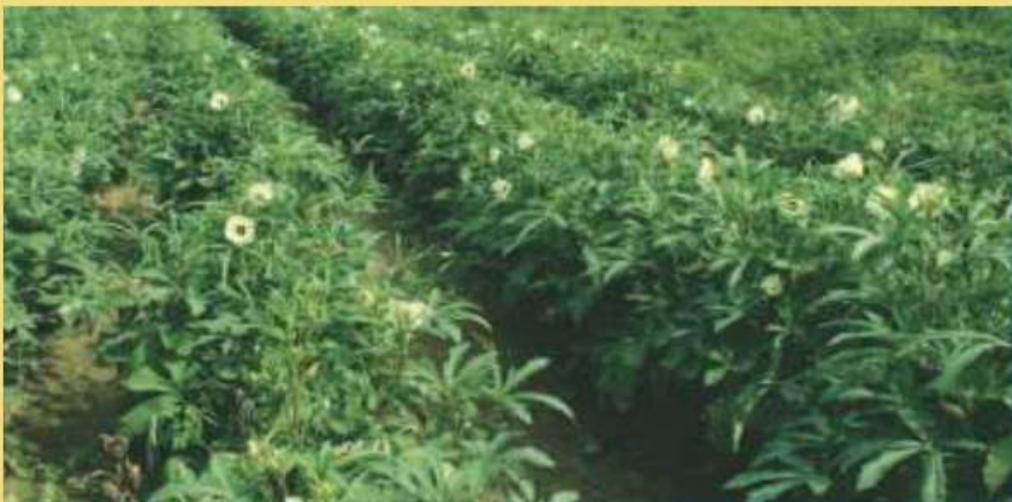

DEEPTI (Research)

Plant type	Tall with short internodes
First picking	45-48 days
Fruit colour	Dark green fruits
Fruit size	Medium long 12-14 cm in length
Remarks	Good yield

HARITA (Imp.)

Plant type	Tall vigorous plant
First picking	42-45 days
Fruit colour	Attractive dark green
Fruit size	12-14 cm in length
Resistance	Strong tolerance to YVMV
Remarks	Very good keeping quality suitable for transportation.

F1- NANO

Plant type	Early maturity variety with vigorous plant
First picking	45-50 days
Fruit colour	Dark green with strong nodes
Fruit length	5-8 cm straight long
Fruit weight	60-80 g
Remarks	Ideal for stuffing, resistance to YVMV

F1- HARI

Plant type	Strong vigorous plants with dark dense foliage
First picking	50 days
Fruit colour	Dark green with medium spines
Fruit length	20-22 cm
Fruit weight	220 g
Remarks	Good keeping quality & suitable for long distance transportation.

F1- 786

Plant type	Vigorous plant with high fruit set
First picking	50-55 days
Fruit colour	Dark green fruit colour with medium spines
Fruit length	10-12 cm
Fruit weight	60 g
Remarks	Heat tolerant, good uniformity

F1- KAPILA

Plant type	Strong vigorous plant with dark green dense foliage
First picking	48 days
Fruit colour	Dark green with strong nodes
Fruit length	22-24 cm
Fruit weight	250-280 g
Remarks	Good bearing thick & firm

F1- MSN 5555

Plant type	Strong vigorous plant with dark green dense foliage
First picking	45-48 days
Fruit colour	Dark green with strong nodes
Fruit length	22-24 cm
Fruit weight	225-250 g
Remarks	Good bearing, high yield

F1- JUHI (JHALARI)

Plant type	Strong vigorous plant with dark green dense foliage
First picking	50 days
Fruit colour	Dark green with smooth nodes
Fruit length	30-35 cm
Fruit weight	300-350 g
Remarks	Good bearing for summer & rainy season, disease tolerance

F₁- RANI

Plant type	Strong vigorous plants
First picking	55-60 days
Fruit colour	Dark green with spineless surface
Fruit length	12-14 cm straight long
Fruit weight	80-100 g
Remarks	Heat tolerant, suitable for long distance transportation.

ASHOK

Fruit shape	Cylindrical With Attractive Pointed thorn Pattern
First picking	45-48 days
Fruit length	15-20 cm
Fruit weight	250-280 g
Remarks	Good keeping quality & suitable for long distance transportation. Good fruit setting

**F1- BAHAR**

Fruit shape	Cylindrical with attractive green
First picking	45-48 days
Fruit length	40-50 cm
Fruit weight	800 g
Remarks	Good keeping quality & suitable for long distance transportation. Good fruit setting

F1- ROYAL

Fruit type	Flatish round
First picking	48-50 days
Fruit Colour	Glossy green
Fruit weight	700-800 g
Remarks	Good keeping quality & good fruit setting

**F1- SUKOMAL**

Fruit type	Lattu type, very soft fruit
First picking	45-48 days
Fruit Colour	Attractive glossy green
Fruit weight	500-600 g
Remarks	Very soft, very tasty after cooked Very good bearing

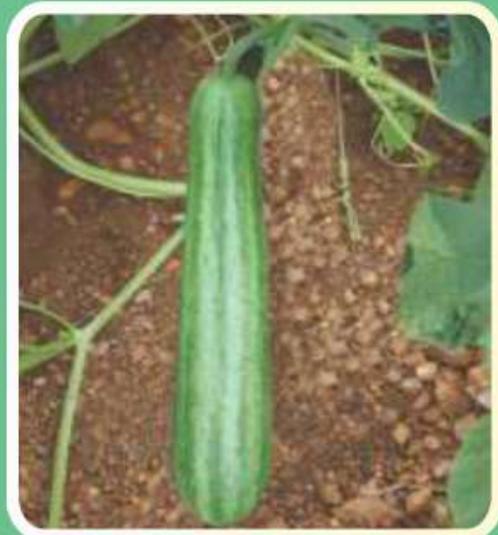

ADITI

Plant type	Dark green foliage, vigorous vines
First picking	55-60 days
Fruit length	55-60 cm
Fruit weight	1.25-1.50 kg
Remarks	Good keeping quality & suitable for long distance transportation. Good taste

SUREKHA DHARIDAR

Fruit type	Cylindrical with dark green strips
First picking	60-65 days
Fruit length	50-55 cm
Fruit weight	1.25-1.50 kg
Remarks	Good keeping quality & suitable for long distance transportation. Good taste

TOP (Imp.)

Fruit type	Latto type, soft fruit
First picking	48-50 days
Fruit Colour	Glossy green
Fruit weight	500-600 g
Remarks	Very good in taste

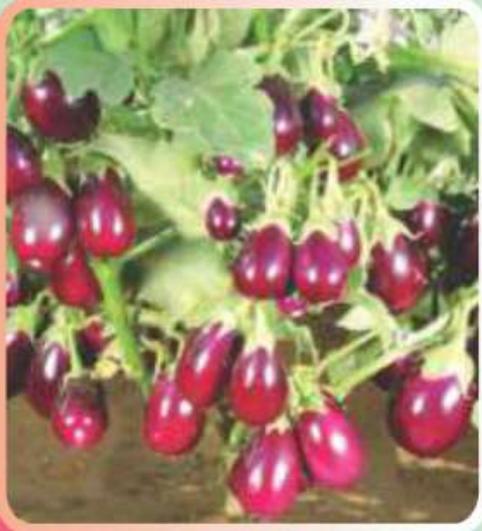

F1- GREEN STAR

Plant habit	Medium tall, vigorous plant
Fruit shape	Elongated oval fruits
Fruit colour	Green with basal white streaks
Fruit weight	180-200 g
First picking	60-62 days after transplanting
Remarks	Tolerance to bacterial wilt

F1- LALITA

Plant habit	Semi erect, vigorous plant
Fruit shape	Long type
Fruit colour	Pink
Fruit weight	100-120 g
First picking	60-65 days after transplanting
Remarks	Tolerance to bacterial wilt

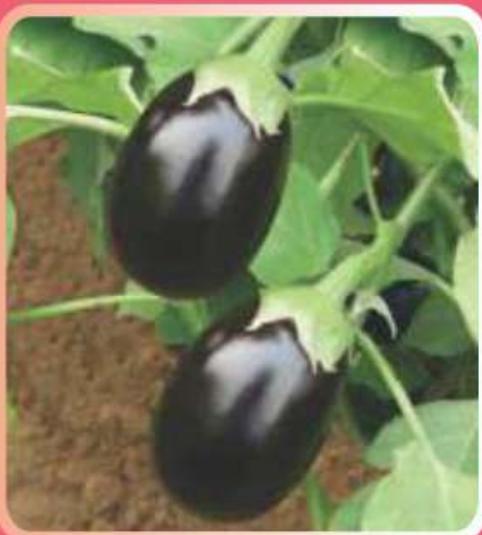

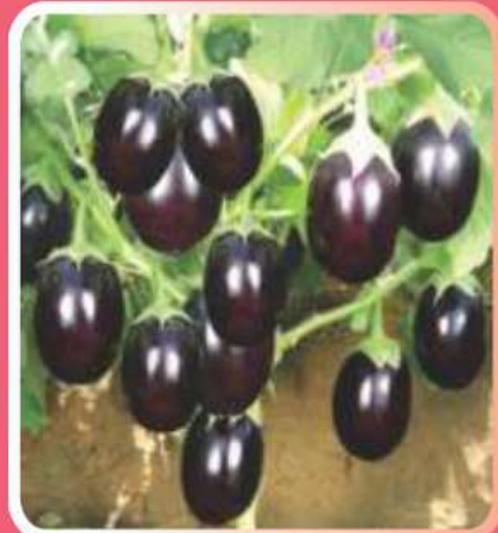

F₁- KAYAMAT (CHU-CHU)

Plant habit	Medium tall, spreading plant
Fruit shape	Oblong round
Fruit colour	Shiny purple
Fruit weight	70-90 g
First picking	50-55 days after transplanting
Remarks	Suitable for stuffing purpose

F₁- KALIKA (CHU-CHU)

Plant habit	Tall vigorous plant with good branching
Fruit shape	Medium size oval fruits
Fruit colour	Shiny blackish purple
Fruit weight	80-100 g
First picking	50-55 days after transplanting
Remarks	Suitable for stuffing purpose

F₁- ISHA

Plant habit	Semi erect habit with tall vigorous plant
Fruit shape	Oblong round
Fruit colour	Glossy black spine less
Fruit weight	100-120 g
First picking	58-60 days after transplanting
Remarks	Very attractive smooth & glossy fruit

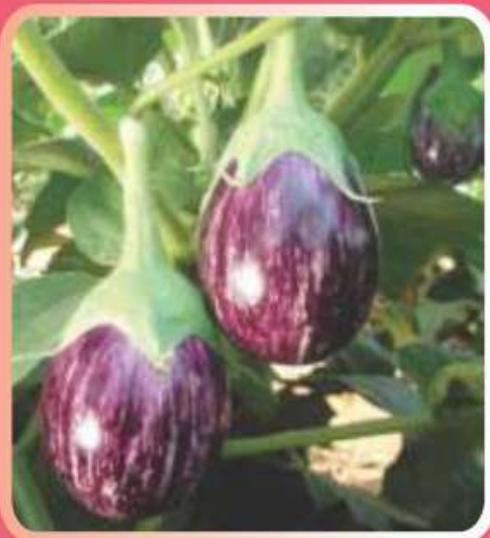

F1- RAJKIRAN

Plant habit	Semi erect, medium tall, vigorous plant
Fruit shape	Round
Fruit colour	Glossy purple
Fruit weight	350-400 g
First picking	60-62 days after transplanting
Remarks	Very soft flesh suitable for bharta

F1- RAJKIRAN-101

Plant habit	Semi erect, medium tall, vigorous plant
Fruit shape	Round
Fruit colour	Blackish purple
Fruit weight	350-400 g
First picking	60-62 days after transplanting
Remarks	Suitable for summer cultivation

F1- MSN-111

Plant habit	Tall vigorous plant with large canopy
Fruit shape	Oval-round
Fruit colour	Purple with white stripes
Fruit weight	90-110 g
First picking	60-62 days after transplanting
Remarks	Spine less calyx with cluster bearing

F₁- NISHU

Plant habit	Tall, vigorous plant
Fruit shape	Oblong
Fruit colour	Dark violet
Fruit weight	100-125 g
First picking	50-55 days after transplanting
Remarks	Suitable for summer & rainy cultivation

F₁- PK-111

Plant habit	Tall spreading vigorous plant
Fruit shape	Medium long fruits
Fruit colour	Dark purple
Fruit weight	90-100 g
First picking	60-62 days after transplanting
Remarks	Highly suitable in rainy season cultivation

F₁- SHIPRA (PPL) TYPE

Plant habit	Tall vigorous plant with semierect habit
Fruit shape	Long cylindrical
Fruit colour	Shiny pinkish purple
Fruit weight	100-120 g
First picking	50-55 days after transplanting
Remarks	Suitable for summer cultivation

GARIMA

Plant habit	Tall, vigorous plant
Fruit shape	Long Cylindrical
Fruit colour	Light Green
Fruit weight	120-150 g
First picking	55-60 Days
Remarks	Excellent Cooking Quality

GIRI

Plant habit	Semi Erect
Fruit shape	Slight Oval
Fruit colour	Green Biotchy
Fruit weight	120-150 g
First picking	55-60 Days
Remarks	Tolrant To Bacterial Wilt

JYOTI

Plant habit	Semi Erect
Fruit shape	Round
Fruit colour	Purple
Fruit weight	250-280 g
First picking	50-55 Days
Remarks	Suitable For Bharta

KANHA

Plant habit	Semi Erect
Fruit shape	Round
Fruit colour	Blackish Purple
Fruit weight	250-280g
First picking	55-60 Days
Remarks	Suitable For Bharta

PURPLE LONG

Plant habit	Semi Erect
Fruit shape	Long Cylindrical
Fruit colour	Purple
Fruit weight	80-100 g
First picking	55-60 Days
Remarks	Long Harvest Period

BLACK LONG

Plant habit	Semi Erect
Fruit shape	Cylindrical
Fruit colour	Black Glossy
Fruit weight	100-120 g
First picking	52-55 Days
Remarks	Long Self Life

F1- BAHUBALI

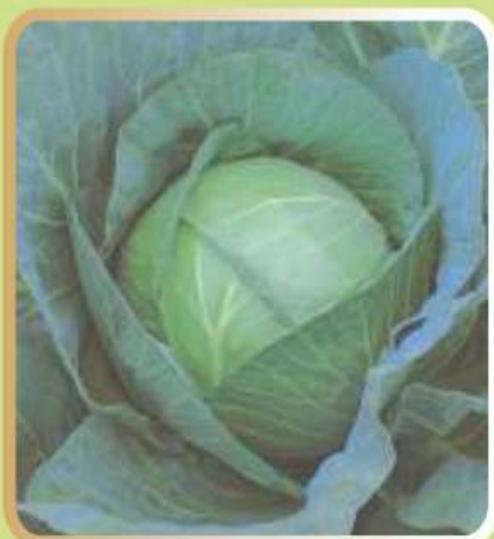

Plant frame	Medium plant
Maturity	65 days after transplanting
Head type	Globe shaped, compact with deep green colour
Head weight	1.20-1.50 kg
Remarks	High tolerance with late bursting resistance to DBM, black rot & heat

F1- EARLY-48

Plant frame	Good green foliage
Maturity	48 days after transplanting
Head type	Round with green colour
Head weight	600-700 g
Remarks	Very Early Hybrid/ Suitable For Main Season

F1- HIM BALL-5

Plant frame	Medium size
Maturity	60-65 days after transplanting
Head type	Round, compact with bluish green colour
Head weight	1.0-1.25 kg
Remarks	Tolerance to black rot

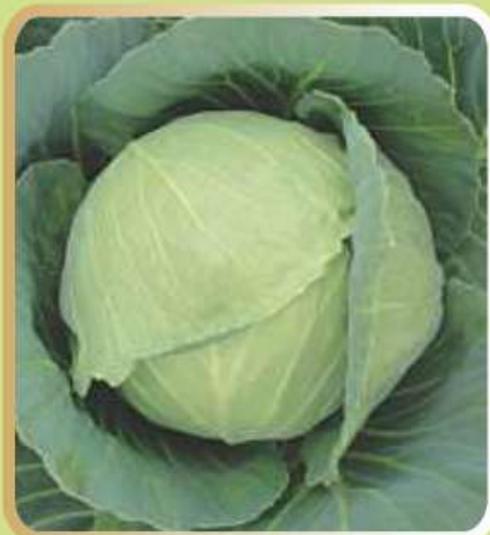

F1- MSN-60

Plant frame	Medium size
Maturity	55-60 days after transplanting
Head type	Round, very compact with bluish green colour
Head weight	1.0-1.25 kg
Remarks	High tolerance to black rot, good field holding capacity

F1- PRADHAN

Plant frame	Medium Frame
Maturity	70 Days
Head type	Coconut Shape
Head weight	1.8-2.2 kg
Remarks	Extremely Uniform, Good Cold Tolerance

GOLDEN ACRE (IMP.)

Plant frame	Medium size
Maturity	55 days after transplanting
Head type	Round ball shape with deep green colour
Head weight	800 g
Remarks	Early maturity OP

**BROCOLLI (HARI)**

Plant frame	Medium
Maturity	65-70 Days
Head type	Dome, Deep Green
Head weight	500-600 g
Remarks	Extremely Uniform

CHINESE CABBAGE PHANTOM

Plant frame	Very big
Maturity	65-70 days
Head type	Barrel shaped with medium green outerpart, innerpart beautiful
Head weight	2.5-3.0 kg
Remarks	Slow bolter, suitable for spring season

**RED CABBAGE**

Plant frame	Small Frame
Maturity	65 Days
Head type	Round red
Head weight	1-1.25 kg
Remarks	Late To Burst

MAHARANI

Root type	Asiatic desi
Maturity	85-90days
Root colour	Deep Red With Red Core
Root shape	Tapered Long
Root length	35-40 cm
Root weight	130-150 g
Remarks	Very Sweet & Good For Juice

SURBHI

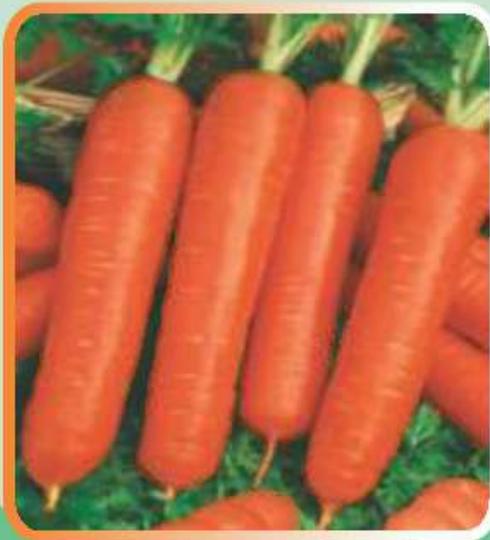

Root type	Asiatic desi
Maturity	80-85 days
Root colour	Dark red owned coloured core
Root shape	Straight long smooth
Root length	35-40 cm
Root weight	125-140 g
Remarks	Very sweet in taste good for making sweets

SHANKAR

Root type	Asiatic
Maturity	85-90 days
Root colour	Dark red self coloured core
Root shape	Straight long
Root length	40-45 cm
Root weight	125-150 g
Remarks	Very sweet in taste

F1 PASSION

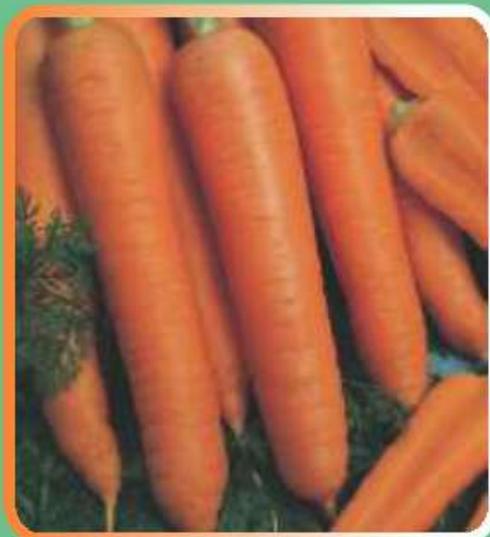

Root type	Cylindrical
Maturity	100-110 days
Root colour	Deep orange, self coloured core
Root shape	Straight Long Smooth, Cylindrical
Root length	18-20 cm
Root weight	125-150 g
Remarks	Late softing without cracking also good for storage in cold

SUPER NEW KURODA

Root type	European
Maturity	95-100 days
Root colour	Orange self coloured core
Root shape	Cylindrical long
Root length	15-20 cm
Root weight	120-130 g
Remarks	Late bolting without cracking

EARLY NANTIS

Root type	European
Maturity	100-110 days
Root colour	Dark red self coloured core
Root shape	slight tapered
Root length	20-22 cm
Root weight	125-150 g
Remarks	Good For Storage

F1 SMILE

Plant type	Medium Erect
Maturity	50-55 Days
Curd type	Semi dome, milky white, compact
Curd weight	600-800 g
Remarks	Suitable for growing in early

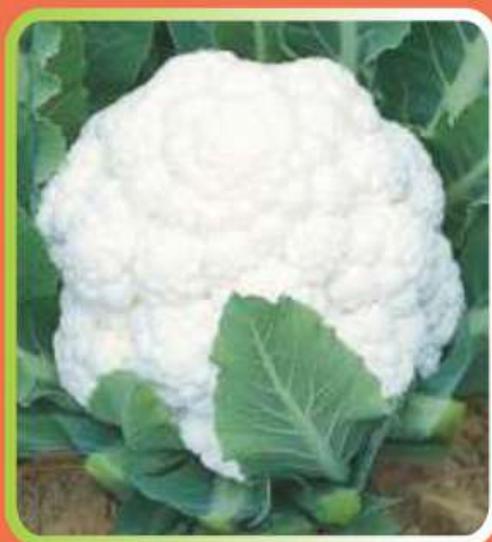

F1- RUCHI

Plant type	Vigorous erect plant
Maturity	60-65 days after transplanting
Curd type	Semi dome, milky white compact curd
Curd weight	1.0-1.25 kg
Remarks	Suitable for growing in early autumn

F1- UMBRELLA-708

Plant type	Strong vigorous plant frame
Maturity	60-65 days after transplanting
Curd type	Dome shaped, very compact white curd
Curd weight	1.25-1.5 kg
Remarks	Wider adaptability to varied climatic condition

F1- PRANTI

Plant type	Bluish green foliage, excellent self blanching
Maturity	70-75 days after transplanting
Curd type	Pure white, dome shaped, very compact curd
Curd weight	1.5-1.75 kg
Remarks	Suitable for poosi season, self covered

F1- SONAKSHI

Plant type	Strong vigorous plant with self blanching
Maturity	75-80 days after transplanting
Curd type	Dome shaped, very compact, white curd
Curd weight	1.75-2.0 kg
Remarks	Suitable for poosi/maghi season self covered

F1- SHARMEELI

Plant type	Vigorous plant with blackish green foliage
Maturity	85-90 days after transplanting
Curd type	Snow white colour with dome shape
Curd weight	1.5-1.80 kg
Remarks	Excellent self covered

PEARL-1

Plant type	Erect medium frame
Maturity	60-65 days after transplanting
Curd type	Semi dome, Creamy white
Curd weight	600-700 g
Remarks	Suitable for early sowing/sowing time 10 June to 20 July in north India

FIRST EARLY

Plant type	Early small frame
Maturity	50-55 days
Curd type	Semi dome
Curd weight	400-600 g
Remarks	Very early maturity

EARLY KUNWARI

Plant type	Erect medium frame
Maturity	55-60 days
Curd type	Semi dome with creamy white colour
Curd weight	600-800 g
Remarks	Wide adaptability, early medium maturity

TEHELKA

Plant type	Erect plant with good foliage
Maturity	65-68 days after transplanting
Curd type	Dome shaped, Milky white, very compact
Curd weight	1.0-1.25 kg
Remarks	Good For Sowing 10 June To 31 July In North India

HUNGAMA

Plant type	Erect plant with dark green foliage
Maturity	65-70 days after transplanting
Curd type	Dome Shaped, Milky White, very compact
Curd weight	1.0-1.25 kg
Remarks	Suitable for early to mid-group sowing/ sowing time 10 June to 31 July in North India

M P SPECIAL

Plant type	Erect vigorous plant
Maturity	65-70 days after transplanting
Curd type	Dome shaped, White, Very compact
Curd weight	1.0-1.25 kg
Remarks	Suitable for early to mid-group sowing time 1 June to 31 July in north India

PEARL-2

Plant type	Erect plant with medium frame
Maturity	65-70 days after transplanting
Curd type	Compact white dome
Curd weight	0.8-1.0 kg
Remarks	Suitable for mid-group sowing/ sowing time 20 July to 15 August in north India

KATKI

Plant type	Erect, good frame
Maturity	60-65 days
Curd type	Dome shaped with white colour
Curd weight	800-1000 g
Remarks	Compact curd

PEARL-3

Plant type	Spreading type green foliage
Maturity	70-75 days after transplanting
Curd type	Dome with white colour
Curd weight	1.0-1.25 kg
Remarks	Very good self blanching with semi covered, sowing time 1 August to 31 August in north India

AGHANI

Plant type	Erect, strong vigorous plant
Maturity	70-75 days
Curd type	Dome shaped with white colour
Curd weight	1.00-1.25 kg
Remarks	Very compact curd

PEARL-4

Plant type	Erect, Strong Vigorous Plant
Maturity	75-80 days
Curd type	Dome shaped with white colour
Curd weight	1.25-1.5 kg
Remarks	Semi Self Covered

POOSI

Plant type	Strong Vigorous Plant
Maturity	75-80 days
Curd type	Dome with white colour
Curd weight	1.5-2 kg
Remarks	Good Self Life

F₁- MSN-24

Plant type	Medium spreading vigorous plant
First picking	60-65 days after transplanting
Fruit colour	Medium green with smooth surface
Fruit length	8-10 cm
Fruit thickness	1.0-1.1 cm
Pungency	Highly pungent
Remarks	Recommended for fresh market

F₁- GODAVARI

Plant type	Vigorous tall spreading plant
First picking	65-68 days after transplanting
Fruit colour	Deep red
Fruit length	8-9 cm
Fruit thickness	1.0-1.1 cm
Pungency	Highly pungent
Remarks	Recommended for fresh & dry market

F₁- SALONI

Plant type	Medium spreading vigorous plant
First picking	65-68 days after transplanting
Fruit colour	Attractive light green wrinkled fruit
Fruit length	12-14 cm
Fruit thickness	1.1-1.3 cm
Pungency	Highly pungent
Remarks	Suitable for fresh market, heat tolerance

JWALA

Plant type	vigorous tall plant 90cm
First picking	75 days after transplanting
Fruit colour	Glossy Light Green With Wrinkle
Fruit length	14-15 cm
Fruit thickness	1.0-1.2 cm
Pungency	Good
Remarks	Medium Yielding For Fresh Market

CHILLI G-4

Plant type	Medium Tall Vigorous Plant
First picking	70 days after transplanting
Fruit colour	Dark Green Smooth Fruit
Fruit length	8-12 cm
Fruit thickness	1.2-1.3 cm
Pungency	Good
Remarks	Good Self Life 15-20 Days

UPRIGHT

Plant type	Perennial with upright growth 60 to 80 cm
First picking	60-65 days after transplanting
Fruit colour	Dark Green With Clusters Of 5-6 Chilli
Fruit length	8-9 cm
Fruit thickness	1.1-1.2 cm
Pungency	High
Remarks	Tolerant To Bacterial Wilt & Thrips

KHUSHBOO

Plant type	Vigorous plant
Leaf type	Dark green colour with broad leaves
Harvesting	Starts in 35 days
Remarks	Round the year cultivation, late bolter, good aroma

KHUSHBOO (SPLIT)

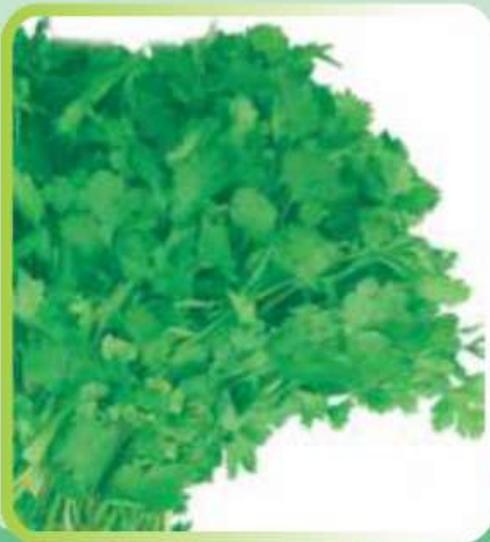

Plant type	Vigorous plant
Leaf type	Dark green colour with broad leaves
Harvesting	Starts in 35 days
Remarks	Round the year cultivation, late bolter, good aroma

MSN - DESI

Plant type	Medium vigorous plant
Leaf type	Dark green colour with medium leaves
Harvesting	Starts in 30 days
Remarks	Multicut with more good aroma

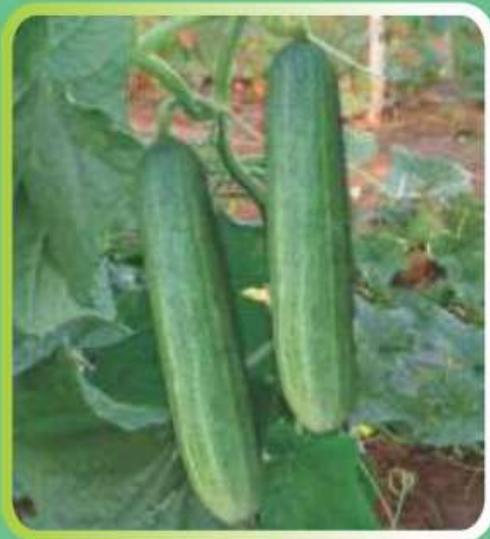

SPEED 30

Plant type	Medium vigorous plant
Leaf type	Dark green colour with medium leaves
Harvesting	Starts in 30 days
Remarks	Early Harvest

F1- SONIA

Plant type	Medium tall plant with dark green foliage
First picking	60-65 days after transplanting
Fruit colour	Dark green, 3-4 lobed blocky fruits
Fruit weight	150-180 g
Remarks	Good yield potential with excellent firmness

F1- HERO

Plant type	Highly vigorous plant with dense foliage
First picking	36-38 days
Fruit colour	Glossy green
Fruit length	20-22 cm cylindrical fruits
Fruit weight	Around 220 g
Remarks	Suitable for winter season and long transportation

F1- SUPER E.G.

Plant type	Highly vigorous plant with dense foliage
First picking	35 days
Fruit colour	Medium green
Fruit length	16-18 cm
Fruit wieght	180-200 g
Remarks	Very early maturity with high yield

F1- VIRAT

Plant type	Vigorous plant with dense foliage
First picking	35-36 days after sowing
Fruit colour	Attractive green
Fruit length	20-22 cm
Fruit wieght	250-300 g
Remarks	Continous fruiting for a long time Early variety .

F1- SIKANDER

Plant type	Strong vigorous dense foliage
First picking	35-37 days
Fruit colour	Dark green
Fruit length	18-20 cm
Fruit wieght	240-280 g
Remarks	Asian Type Large Cucumbers, High Yield Variety

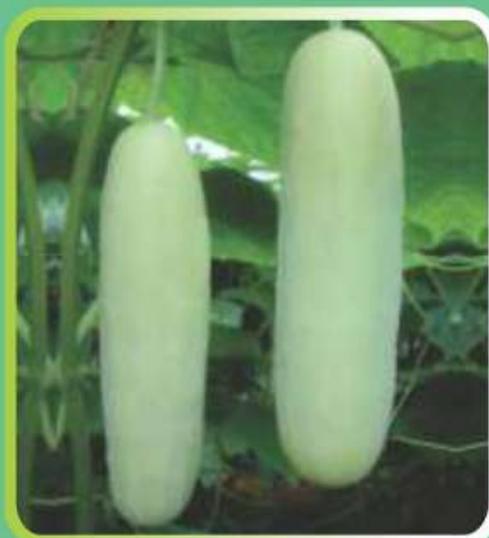

F₁- PARTH

Plant type	Highly vigorous with short inter-nodes
First picking	35-37 days after sowing
Fruit colour	Slightly ribbed dark green
Fruit length	17-18 cm
Fruit weight	180-200 g
Remarks	Parthenocarpic hybrid, suitable for poly houses, multiple fruits per node

F₁- KRISH

Plant type	Medium vigorous plant with dense foliage
First picking	35-37 days
Fruit colour	Attractive blackish green
Fruit length	14-16 cm
Fruit weight	160-175 g
Remarks	Early maturity hybrid with good yield

F₁- MOHINI

Plant type	Medium vigorous plant with dense foliage
First picking	35-38 days
Fruit colour	Attractive whitish green
Fruit length	14-16 cm
Fruit weight	160-180 g
Remarks	Early maturity hybrid with good yield

F₁- SHALINI

Plant type	Very vigorous plant with dense foliage
First picking	38-40 days
Fruit colour	Attractive green, Uniform cylindrical
Fruit length	18-20 cm
Fruit weight	200-220 g
Remarks	Continuous fruiting for a long time. Suitable for long transportation

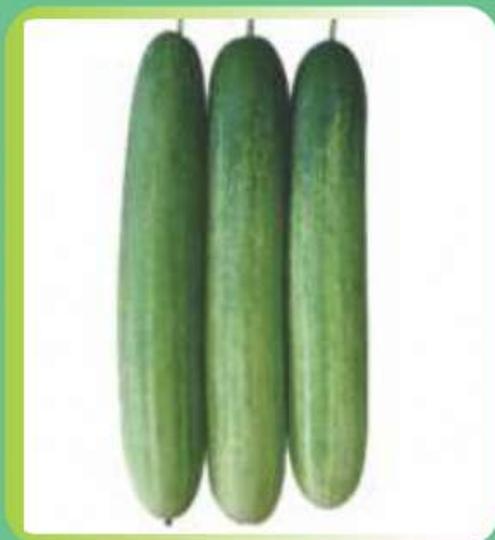

F₁- E.G.

Plant type	Highly vigorous plant with dense foliage
First picking	35-38 days
Fruit colour	Attractive green
Fruit length	18-20 cm cylindrical fruits
Fruit weight	180-200 g
Remarks	Suitable for winter season and long transportation

PUNJABI SARTAJ

Plant type	Highly vigorous plant with strong branches
First picking	50-55 days
Fruit colour	Attractive green
Fruit length	25-28 cm cylindrical smooth fruits
Fruit weight	200-220 g
Remarks	Suitable for rainy season, Desi type

SUMMER EXP.

Plant type	Medium vigorous vines
First picking	40 days
Fruit colour	Attractive green , slight throny fruit
Fruit length	18-20 cm cylindrical fruits
Fruit wieght	180-220 g
Remarks	Suitable for summer season

PRIYA

Plant type	Strong vigorous vines
First picking	45 days
Fruit colour	Attractive green smooth fruit
Fruit length	28-30 cm cylindrical fruits
Fruit weight	250-280 g
Remarks	Suitable for rainy season

SADABAHAR

Plant type	Strong vigorous vines
First picking	45 days
Fruit colour	Attractive green
Fruit length	28-30 cm cylindrical fruits
Fruit wieght	250-280 g
Remarks	Suitable for both summer & rainy season

CHUTKI

Plant type	Medium Vines
First harvest	30-32 Days Early Harvest
Colour	Light Green / 15-18 Cm
Flower weight	100 g
Remarks	Good for salad, crispy

MADHURI

Plant type	Good vigorous vines
Maturity	35-38 days
Fruit type	Medium long, straight, 30-40 cm
Weight	180-200 g
Remarks	Good for salad, crispy

SURYA PRABHA

Plant type	Good vigorous vines with branches
Maturity	35-38 days
Fruit type	Long snake type, thin, 50-60 cm
Weight	180-200 g
Remarks	Good for salad, crispy

FOOT KAKRI

Plant type	Medium Vines
First harvest	45-50 Days
Colour	Blotchy Green Pinkish Rind
Flower weight	500-800 g
Remarks	Suitable For Rainy Season

PRIYA

Plant type	Strong vigorous vines
First picking	45 days
Fruit colour	Attractive green smooth fruit
Fruit length	28-30 cm cylindrical fruits
Fruit weight	250-280 g
Remarks	Suitable for rainy season

GOLDY (Res.)

Knob shape	Flatish round
Maturity	60-65 days after transplanting
Colour	Light green
Knob weight	200-250 g
Remarks	Very tasty & crispy

F1- YELLOW

Plant type	Medium & vigorous plant
First harvest	50-55 days after transplanting
Colour	Yellow
Flower weight	20-22 g
Remarks	Very good keeping quality

F1- ORANGE

Plant type	Medium & vigorous plant
First harvest	50-55 days after transplanting
Colour	Orange
Flower weight	20-22 g
Remarks	Very good keeping quality

KESRI

Plant type	Medium & vigorous plant
First harvest	65-70 days after transplanting
Colour	Deep orange
Flower weight	18-20 g
Remarks	Highly yield variety

F1- MADHUBALA

Plant Type	Medium Vines, Sparsely Lobed & Dark Green Leaves
Maturity	65-70 days
Fruit colour	Attractive Pale Yellow With Green Strips
Fruit shape	Flatish Round With Dark Orange Flesh
Fruit weight	1000-1100 g
Remarks	High TSS 13-14% , Highly tolerance diseases

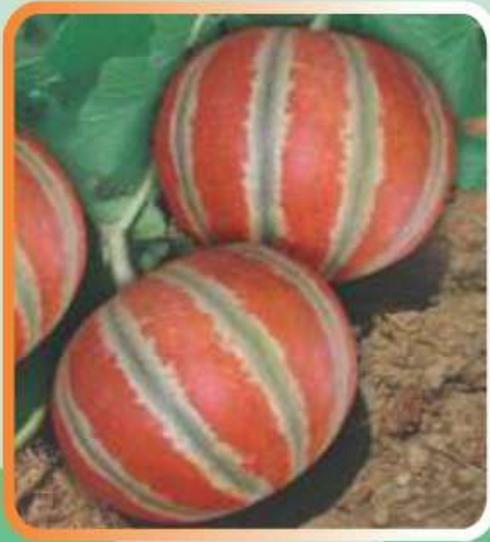

F1- SUWARNA

Plant Type	vigorous vines with green foliage
Maturity	70-75 days
Fruit colour	Golden yellow fruit with deep orange aromatic flesh
Fruit Type	High Round Big Fruit
Fruit weight	1.8-2.0 kg
Remarks	Sweetness 12-13 (brix)

F1 CAZRI-999

Plant Type	medium vines with dark green foliage
Maturity	60-65 days
Fruit colour	Golden yellow fruit with deep orange aromatic flesh
Fruit Type	Attractive Orange Colour With Gree Strip / Juicy Green Flesh
Fruit weight	1000-1100g
Remarks	High TSS 13-14%

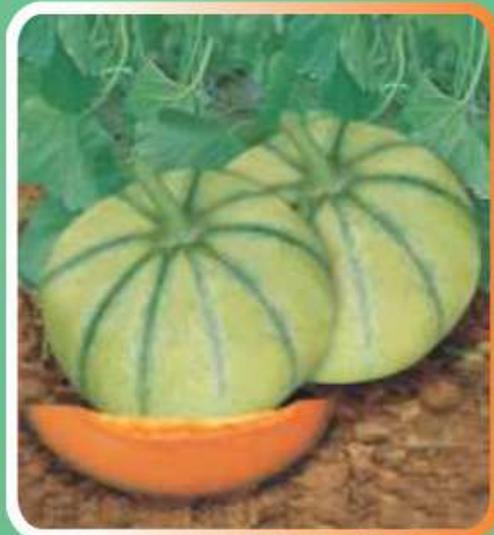

CAZARI

Fruit type	Flatish round fruit
Maturity	60-65 days
Fruit colour	Dark orange colour with green strips, light green flesh
Fruit weight	800-1000 g
Remarks	12-13% TSS

MADHURAS

Fruit type	Flatish round fruit
Maturity	60-65 days
Fruit colour	Yellowish green colour with green strips, light orange flesh
Fruit weight	900-1100 g
Remarks	11-12% TSS

HARMADHU

Fruit type	Pear Shape Big Fruit
Maturity	65-68 days
Fruit colour	Attractive Light Green With Dark Green Strips light green flesh
Fruit weight	1.2-1.5 kg
Remarks	11-12% TSS

F1 RAJA

Bulb type	strong bulb shape
Bulb colour	Shiny Blackish Red
Bulb weight	150-200 g
Maturity	100-110 days
Remarks	Mild in pungency / uniform shape

MSN - RED

Bulb type	Globular shape
Bulb colour	Shiny Red
Bulb weight	120-150 g
Maturity	100-110 days
Remarks	Mild in pungency / good storage

S-221

Bulb type	Globular shape
Bulb colour	Blackish red
Bulb weight	140-160 g
Maturity	100-110 days
Remarks	Mild in pungency

BLACK BEAUTY

Bulb type	Globular shape
Bulb colour	Blackish red
Bulb weight	150-180 g
Maturity	100-110 days
Remarks	Mild in pungency / good storage capacity

MADHU

Plant type	Bushy type with soft vines
Maturity	65-70 days
Pods type	Straight, 8 ovules per pod, cluster of two pods
Picking	4 pickings
Remarks	Suitable for fresh market

NIRALI

Plant type	Bushy type vines
Maturity	80-85 days
Pods type	Straight, 9-10 ovules per pod, cluster of two pods
Picking	3-4 pickings
Remarks	Suitable for fresh market / high yield capacity

MENKA (IMP)

Plant type	Bushy type vines
Maturity	80-85 days
Pods type	Straight, 9-10 ovules per pod, cluster of two pods
Picking	3-4 pickings
Remarks	Suitable for fresh market / high yield capacity / very uniform

F₁- UDAY

Vines type	Semi dwarf vines with green leaves
Maturity	100-110 days
Fruit shape	Oval shape, deep green with cream spots
Flesh colour	Whitish yellow, thick flesh
Fruit weight	5.0-7.0 kg
Remarks	Suitable for spring to summer season

F₁ - DEV

Vines type	Vigorous growing vines with big glossy green leaves
Maturity	88-90 days
Fruit shape	Flatish round with raised ridges
Flesh colour	Whitish yellow, thick flesh
Fruit weight	3.0-5.0 kg
Remarks	Wide adaptability area

CHAKRA

Vines type	Vigorous vegetative vines with soft leaves
Maturity	95-100 days
Fruit shape	Flatish round with raised ridges
Flesh colour	Yellowish white
Fruit weight	5.0-8.0 kg
Remarks	Wide adaptability season

F1- SUPER CROSS

Root type	Cylindrical long tapering
Maturity	32-35 days very early maturity
Root colour	white , smooth
Root length	20-24 cm , diameter 3-4 cm
Root weight	250 g
Remarks	Suitable For Summer/ Rainy Season

F1- SF-30

Root type	Cylindrical long tapering with chetaki type leaves
Maturity	32 days
Root colour	White
Root length	35-40 cm
Root weight	250-280 g
Remarks	Suitable for summer / rainy season

F1- DLX-32

Root type	Cylindrical tapering straight with palak patta type leaf
Maturity	30-32 days
Root colour	Super white, smooth surface
Root length	28-30 cm
Root weight	160-180 g
Remarks	Suitable for summer / rainy season, Late bolter

RADISH

F1- SUPER WHITE

Root type	Cylindrical long tapering cut leaf
Maturity	45-50 days
Root colour	Excellent super white
Root length	42-45 cm
Root weight	220-240 g
Remarks	Suitable for winter season

F1- SPRING RANI

Root type	Cylindrical long tapering
Maturity	55-60 days
Root colour	White
Root length	40-45 cm
Root weight	180-200 g
Remarks	Suitable for late spring to early summer, late bolter

SHUBHRA-32

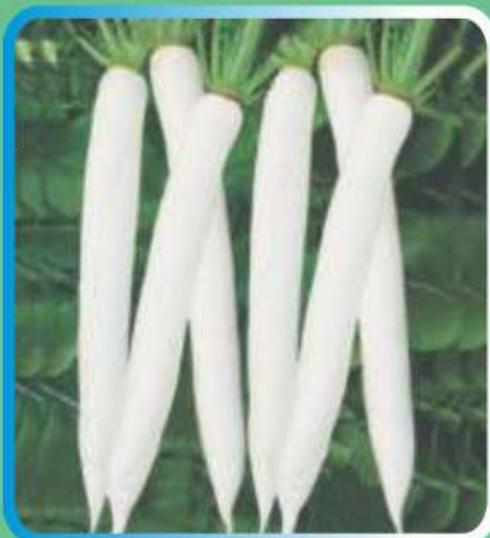

Root type	Cylindrical tapering straight with palak patta type leaf
Maturity	28-30 days
Root colour	Super white, smooth surface
Root length	35-40 cm
Root weight	180-200 g
Remarks	Suitable for summer / rainy season

LONG CHETAKI

Root type	Cylindrical long tapering with smooth leaf foliage
Maturity	35-38 days
Root colour	White
Root length	35-40 cm
Root weight	160-180 g
Remarks	Suitable for summer / rainy season

WINTER STAR

Root type	Cylindrical long tapering with smooth leaf foliage
Maturity	38-40 days
Root colour	White
Root length	35-40 cm
Root weight	160-180 g
Remarks	Suitable for winter season

RADISH

MINO EARLY

Root type	Cylindrical long tapering cut leaves
Maturity	50-55 days
Root colour	Excellent white
Root length	40-45 cm
Root weight	220-240 g
Remarks	Suitable for winter season harvest

HILL QUEEN

Root type	Cylindrical long tapering cut leaves
Maturity	55-60 days
Root colour	White
Root length	40-45 cm
Root weight	220-240 g
Remarks	Suitable for winter season harvest

MINO (IMP)

Root type	Cylindrical long straight with cut leaves
Maturity	55-60 days
Root colour	White
Root length	40-45 cm
Root weight	220-240 g
Remarks	Suitable for winter season

LEADER

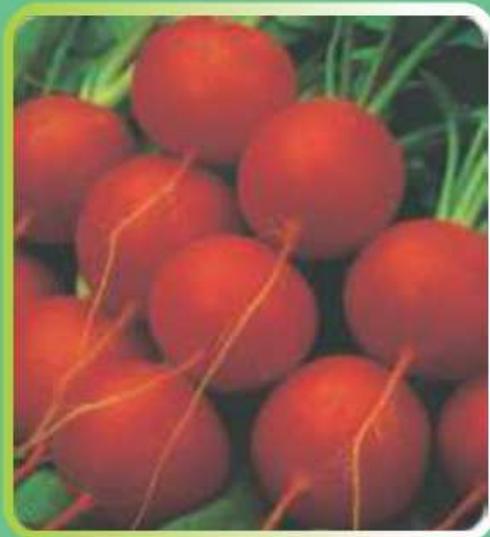

Root type	Cylindrical long without leaf
Maturity	50-55 days
Root colour	White smooth
Root weight	200-220 g
Remarks	Good length, suitable for winter season harvest

CHINESE PINK

Root type	Cylindrical short straight
Maturity	35-40 days
Root colour	Glossy pinkish red
Root length	18-20 cm
Root weight	120-140 g
Remarks	Suitable for rainy season

RED GLOBE

Root type	Round
Maturity	20-25 days
Root colour	Scarlet red
Root weight	50-60 g
Remarks	Suitable for winter season

F1- SHILPA

Plant type	Strong vigorous vines with continuous bearing
First picking	42-45 days
Fruit colour	Attractive green
Fruit length	30-35 cm medium long
Fruit weight	175-200 g
Remarks	High yield potential with slow seed maturity & good keeping quality

F1- REKHA

Plant type	Strong vigorous vines with continuous bearing
First picking	42-45 days
Fruit colour	Dark green
Fruit length	45-50 cm straight long
Fruit weight	300-350 g
Remarks	High yield potential with slow seed maturity & good keeping quality

F1- KAREENA

Plant type	Vigorous growing vines with dense covering foliage with continuous bearing
First picking	45-48 days
Fruit colour	Dark green
Fruit length	25-30 cm straight long
Fruit weight	200-225 g
Remarks	Good yield potential with slow seed maturity

F1- CHARMING WHITE

Plant type	Prolific spreading climber
First picking	50-52 days
Fruit colour	Light glossy green
Fruit length	28-30 cm long cylindrical & thin
Fruit weight	200-225 g
Remarks	Good yield potential with slow seed maturity

SURELI

Plant type	Vigorous growing vines with dense covering foliage with continuous bearing
First picking	50-55 days
Fruit colour	Dark green with smooth surface
Fruit length	40-45 cm long cylindrical & thin
Fruit weight	150-160 g
Remarks	High yield potential with slow seed maturity. Good for transportation

CHIKNI SPECIAL

Plant type	Vigorous growing vines with dense covering foliage with continuous bearing
First picking	50-55 days
Fruit colour	Dark green with smooth surface
Fruit length	30-35 cm long cylindrical & thin
Fruit weight	150-180 g
Remarks	Good yield potential

SINGRA SPECIAL

Plant type	Erect Medium Vigorous
Harvesting	60-65 Days
pod length	12-15 cm
Remarks	Suitable For Spring Season

SUPRIYA

Plant type	Upright with soft leaves
Harvesting	Starts in 45 days
Leaf type	Glossy dark green with broad foliage
Remarks	Late bolter, good for cooking & salad

PREETI

Plant type	Upright with thorny leaves
Harvesting	Starts in 45 days
Leaf type	Dark green colour with good foliage
Remarks	Good in taste

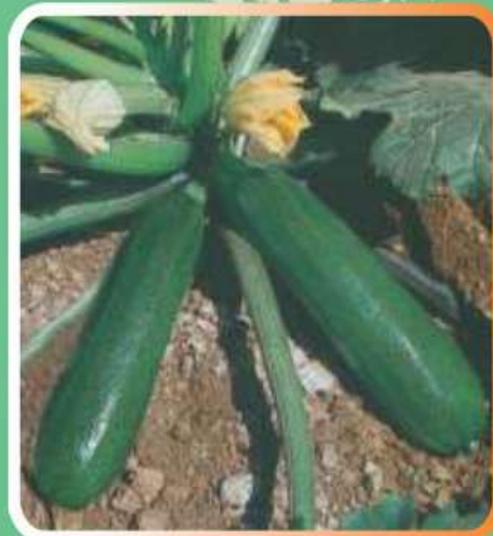

F₁- YELLOW LONG

Plant type	Strong vigorous upright plant
First picking	35-40 days
Fruit colour	Yellow
Fruit length	25-30 cm cylindrical
Fruit weight	180-200 g
Remarks	Very good fruit bearing

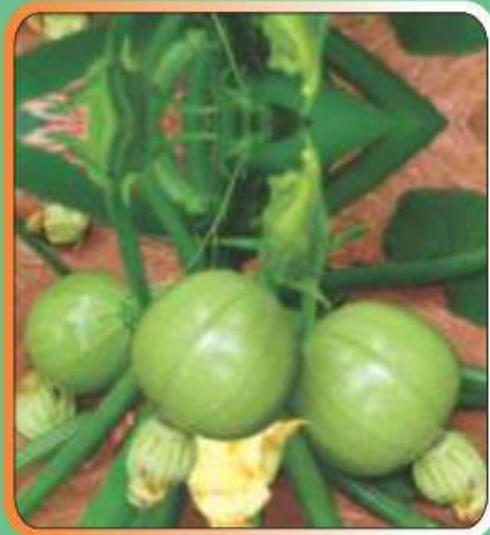

F₁- VAISHNAVI

Plant type	Erect with strong vigorous plant
Maturity	32-35 days
Fruit colour	Waxy medium to dark green
Fruit length	28-30 cm cylindrical
Fruit weight	180-200 g
Remarks	Suitable for winter season

F₁- UNIVERSAL ROUND

Plant type	Strong vigorous vines with continuous bearing
First picking	42-45 days
Fruit colour	Attractive green
Fruit Shape	Round
Fruit weight	175-200 g
Remarks	High yield potential with slow seed maturity & good keeping quality

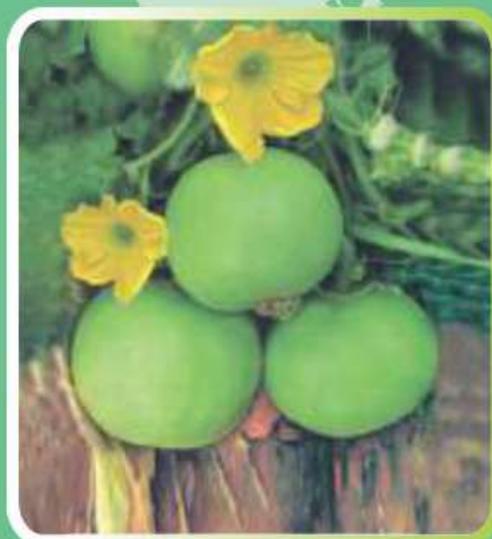

F₁ MEETHI

Plant type	Erect / 100-120 Cm Height
Harvest	65-70 Days
Cob Type	Long , Cylindrical With Golden Light Yellow Colour
Cob Length	20-22 cm
Cob Diameter	5.2-5.6 Cm , Good Firmness
Weight	500-550 g
Remarks	Excellent Tip Filling Good Self Life , High Sweets

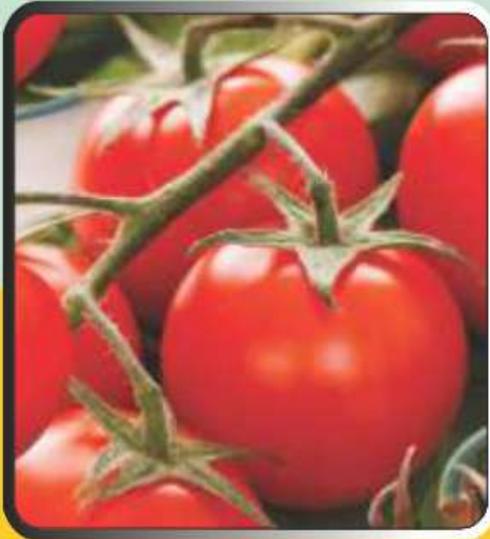

F₁ - GOAL

Plant type	Shiny Green Leaf With Medium Vines
First picking	48-50 days
Fruit shape	Round , shiny hairy green and uniform
Fruit weight	45-50 g
Remarks	High Yield Variety , Continous Bearing

KOMAL

Plant type	Glossy colour plant with vigorous vines
First picking	48-50 days
Fruit shape	Round with glossy green colour
Fruit weight	80-85 g
Remarks	Good Yield Variety

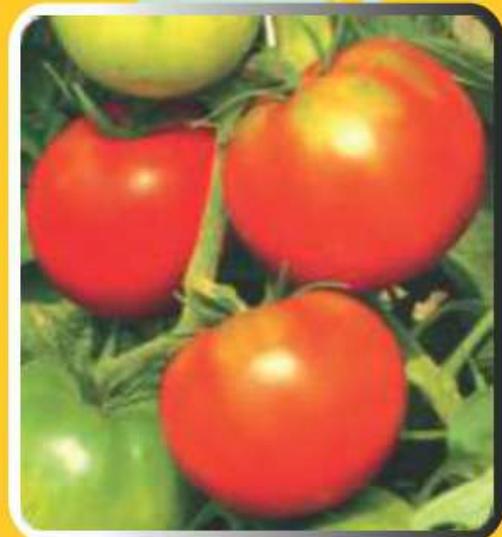

F1- MSN-55

Plant type	Determinate medium vigorous plant
First picking	60-65 days after transplanting
Fruit colour	Deep red
Fruit shape	Flat round
Fruit weight	90-100 g
Remarks	Good keeping quality, sour taste

F1- BASANTI

Plant type	Determinate vigorous strong plant with good foliage
First picking	70-75 days after transplanting
Fruit colour	Red with green shoulder
Fruit shape	Flat round
Fruit weight	90-110 g
Remarks	Good keeping quality & desi type with sour taste

F1- MSN-75

Plant type	Tall determinate vigorous plant with good foliage
First picking	70-75 days after transplanting
Fruit colour	Very deep red
Fruit shape	Highly round very firm fruit
Fruit weight	100-120 g
Remarks	Good keeping quality, suitable for good transportation

F₁- LAL SONA PLUS

Plant type	Indeterminate vigorous plant
First picking	65-70 days after transplanting
Fruit colour	Deep red
Fruit shape	Round
Fruit weight	90-100 g
Remarks	Very smooth fruit, suitable for transportation

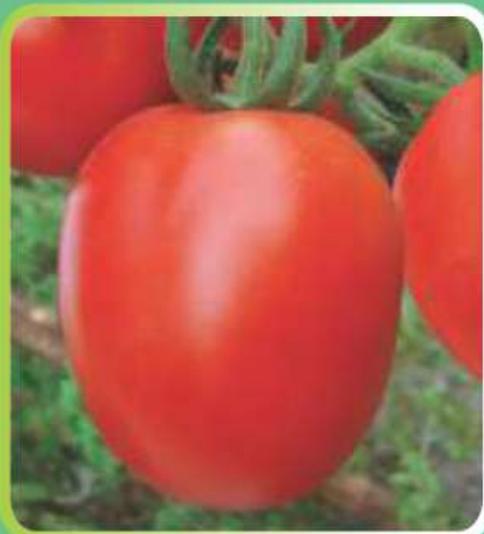

F₁- SHAAN

Plant type	Tall determinate, strong, vigorous plant
First picking	70-75 days after transplanting
Fruit colour	Deep red
Fruit shape	Square round, very firm fruit
Fruit weight	100-110 g
Remarks	Better level of resistance to TLCV

F₁- T 610

Plant type	Semi determinate strong plant
First picking	65 days after transplanting
Fruit colour	Bright red
Fruit shape	Oval shape
Fruit weight	120-130 g
Remarks	High tolerance to BW, FW and TYLCV

F1- T 615

Plant type	Semi determinate vigorous plant
First picking	65-70 days after transplanting
Fruit colour	Deep red
Fruit shape	Oval oblong shape
Fruit weight	130-140 g
Remarks	High tolerance to BW, FW and TYLCV

F1 TOM STAR

Plant type	Determinate vigorous plant
First picking	65-70 days after transplanting
Fruit colour	Red
Fruit shape	Round
Fruit weight	80-100 g
Remarks	Firm, good

NAVYA

Plant type	Determinate vigorous plant
First picking	65-70 days after transplanting
Fruit colour	Red
Fruit shape	Round
Fruit weight	80-100 g
Remarks	Firm, good

S-22

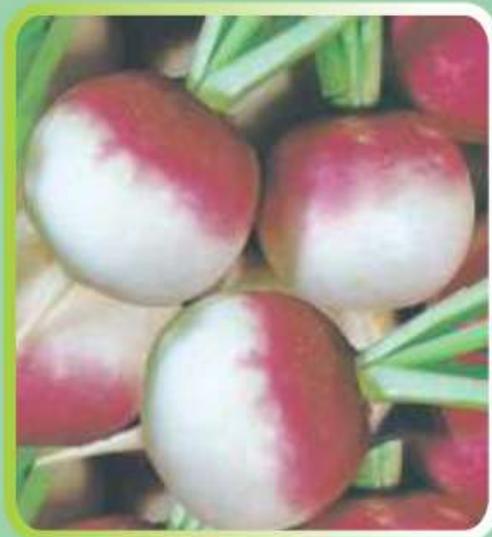

Plant type	Long Determinate
First picking	60-65 days after transplanting
Fruit colour	Dark Red
Fruit shape	Round
Fruit weight	80-100 g
Remarks	Firm, good

RUBY RED

Plant type	Vigorous & erect plant with broad leaves
Maturity	35-40 days
Root shape	Globe with dark red colour
Root weight	200-220 g
Remarks	Early maturity

PURPLE TOP WHITE (Imp.)

Plant type	Erect plant with broad leaves
Maturity	40 days
Root shape	Globe with purple top shade
Root weight	250-300 g
Remarks	Very good uniformity

F₁- SHEHENSHAH

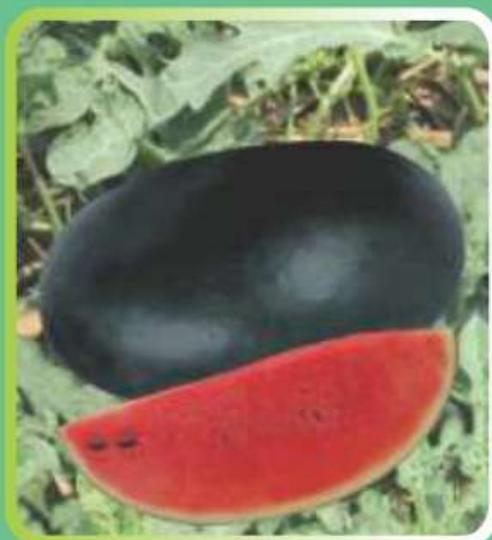

Plant type	Prolific bearer with vigorous plant
Maturity	80-85 days
Fruit colour	Blackish rind with bright red flesh
Fruit shape	Round
Fruit weight	6-8 kg
Remarks	Crispy texture & nice flavour

F₁- CHETAN (ICE BOX)

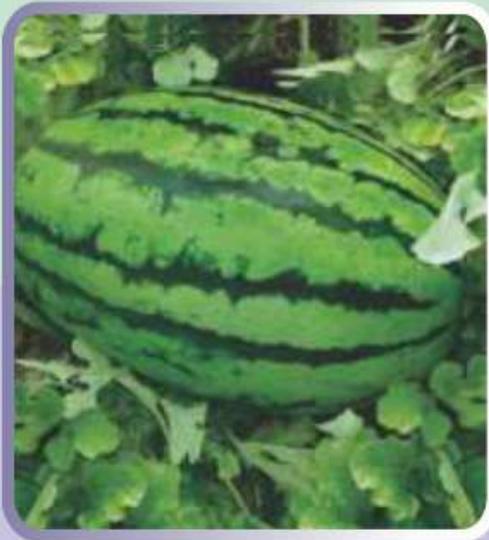

Plant type	Prolific bearer with vigorous plant
Maturity	70-75 days
Fruit colour	Blackish green rind with dark red flesh
Fruit shape	Oblong
Fruit weight	3-4 kg
Remarks	13-14% TSS

F₁- BLACK BERRY (ICE BOX)

Plant type	Prolific bearer with vigorous plant
Maturity	70-75 days
Fruit colour	Blackish rind with dark red flesh
Fruit shape	Oblong
Fruit weight	2.5-3.0 kg
Remarks	13-14% TSS

F1- SWEETY

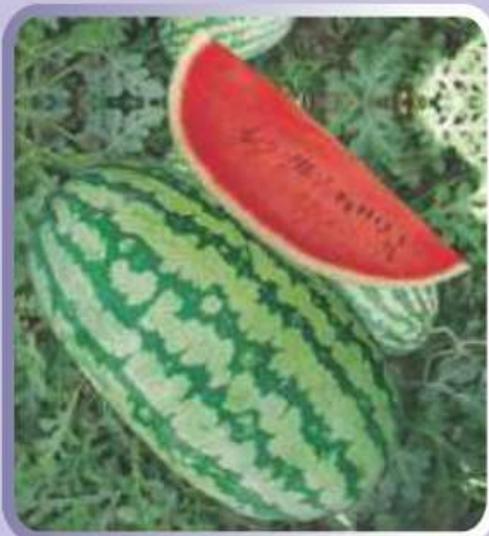

- Plant type Very strong vigorous plant with dense foliage
- Maturity 85-90 days
- Fruit colour Light green rind with dark green stripes & deep red flesh colour
- Fruit shape Oblong
- Fruit weight 10-12 kg
- Remarks Suitable for long transportation

F1- SAHYADRI

- Plant type Prolific bearer with vigorous plant
- Maturity 85-90 days
- Fruit colour Light green rind with dark green stripes & deep red flesh colour
- Fruit shape Oblong
- Fruit weight 12-14 kg
- Remarks 13-14% TSS

F1- KING

- Plant type Very strong vigorous plant
- Maturity 80-85 days
- Fruit colour Light green rind with dark green stripes, fibre less flesh having deep red colour
- Fruit shape Oblong shaped fruit
- Fruit weight 8-10 kg
- Resistance 12-13% TSS

F₁- TASTY

Plant type	Vigorous plant
Maturity	80-85 days
Fruit colour	Light green rind with green stripes & bright red flesh colour
Fruit shape	Oblong
Fruit weight	8-10 kg
Remarks	Small Seed Variety , Suitable For Long Transportation

BLACK WONDER

Plant type	Prolific bearer with vigorous plant
Maturity	80-85 days
Fruit colour	Blackish green rind with dark red flesh
Fruit shape	Round
Fruit weight	6-7 kg
Remarks	13-14% TSS
